IDEA TITLE

SMART INDIA HACKATHON 2026

A sighting should change the next walk

Proposed solution

How it addresses the problem

Makes recent sightings usable before a walk.
Connects local awareness with nearby animal and rabies-care searches.

Innovation and uniqueness

Checks the evidence behind each report.
Ranks routes by exposure to active sightings.
Keeps report status and reasons traceable.

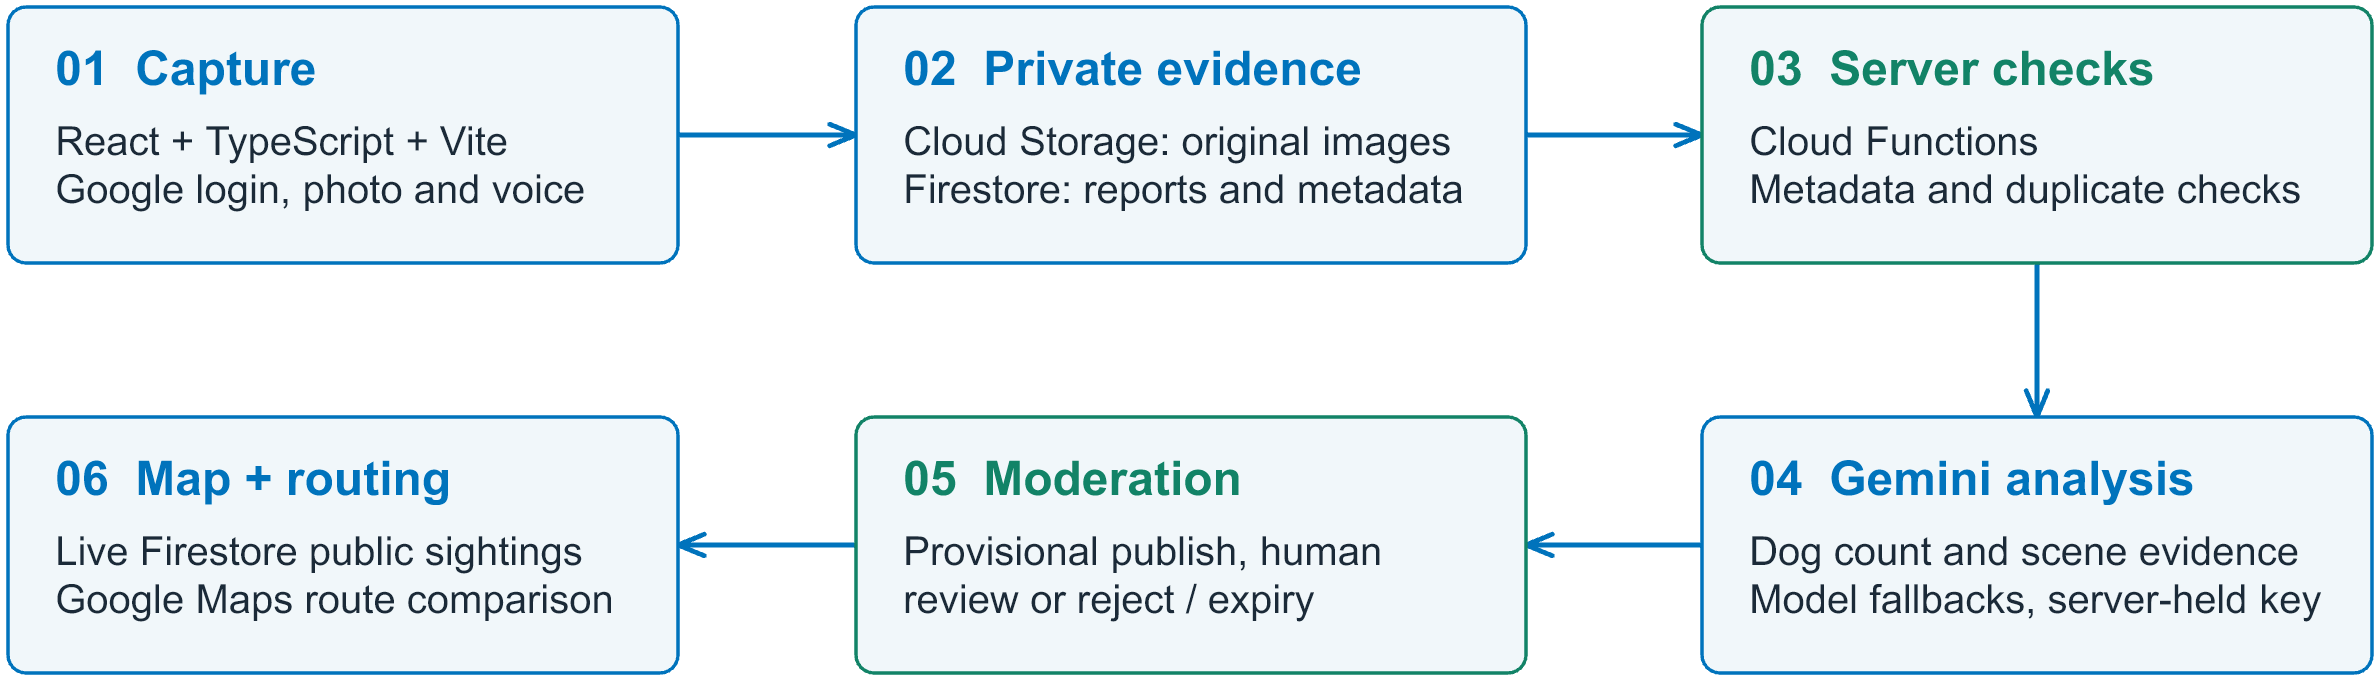

Designed for precaution and informed choices. No route carries a safety guarantee.

Team Pawlytics

TECHNICAL APPROACH

SMART INDIA HACKATHON 2026

Evidence in. A moderated safety signal out.

Technologies

Firebase Hosting + Auth + Firestore + Storage + Functions / Google Maps / Gemini

Team Pawlytics

FEASIBILITY AND VIABILITY

SMART INDIA HACKATHON 2026

A working prototype with clear pilot gates

Feasibility of the idea

Built: Google login, photo uploads, server verification, live sightings and route ranking.
Pilot: validate the evidence checks and route choices with local field partners.

Potential challenges and risks	Strategies for overcoming them
Weak, missing or misleading photo evidence	Metadata checks and uncertain-case human review.
Stale sightings and incomplete coverage	Expiry, reporter trust and visible report status.
API cost, quotas and service interruptions	Rate limits, model fallback and stalled-job recovery.

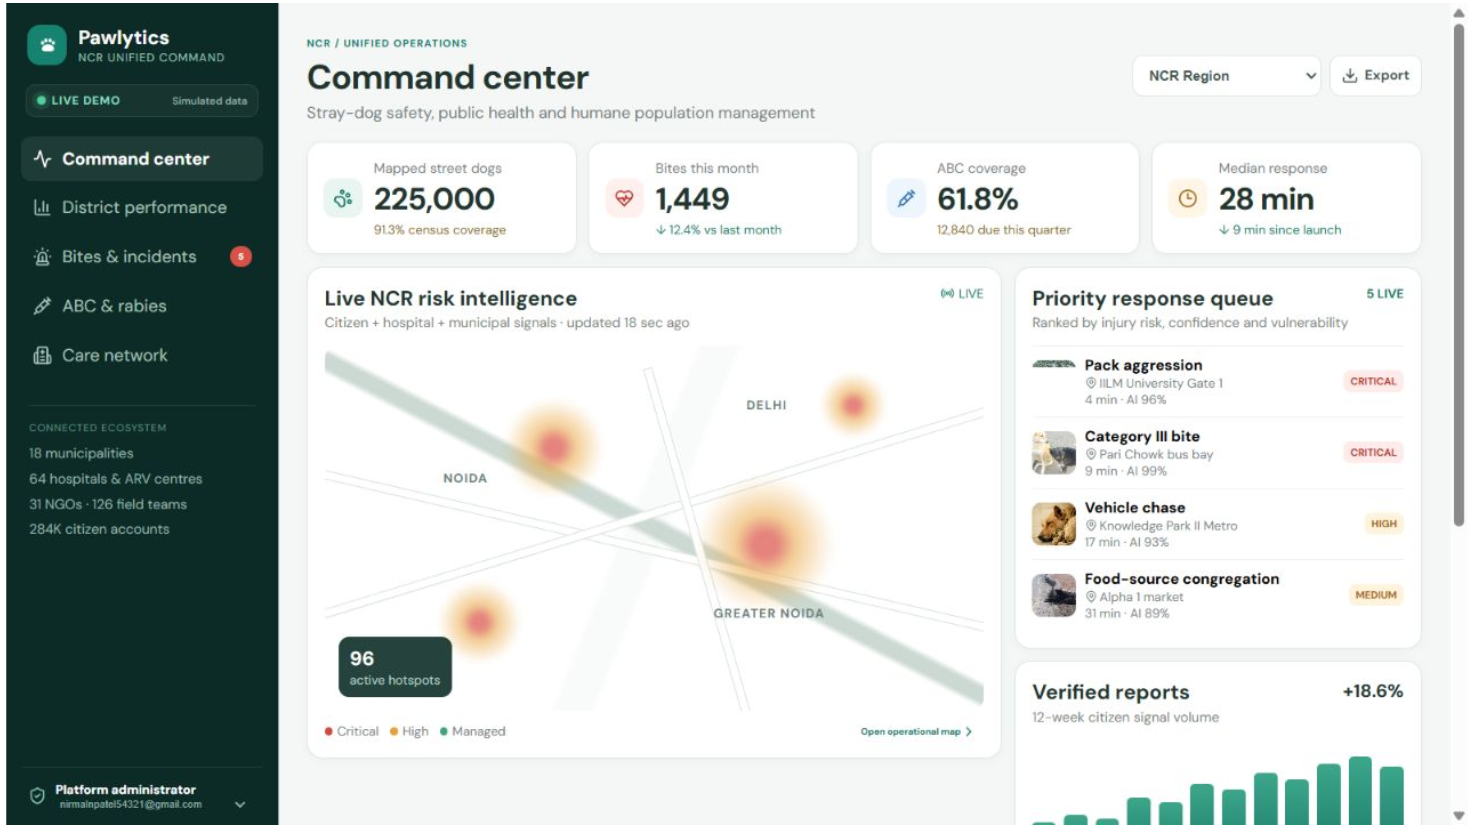

Before public rollout: field validation, response ownership and production-hardening gates.

Team Pawlytics

IMPACT AND BENEFITS

SMART INDIA HACKATHON 2026

One view for coordinated local response

Citizens

Earlier awareness.
A clearer path to care.

Municipal teams

Shared priorities and traceable follow-up.

Animal welfare

Evidence to guide humane care and field response.

NCR command-centre concept uses simulated data. Social and operational benefits require pilot evaluation.

Research and references

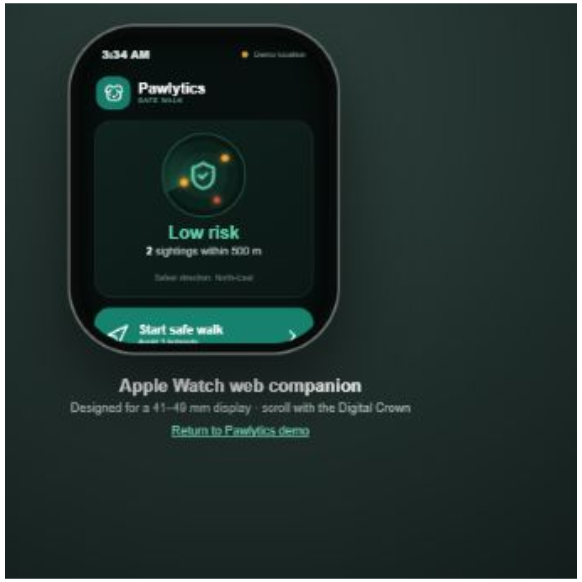

1 PIB / NCDC: reported dog-bite burden, 2024

37,17,336 dog-bite cases and 54 reported suspected rabies deaths.
PIB, 22 July 2025. Reported totals do not measure the full burden.

2 Geospatial dog-bite analysis in India, 2018–2023

Janekunte et al., 2025. Spatial-analysis precedent.
This research does not validate Pawlytics route scores.
